

Finding serial numbers on IQS-600

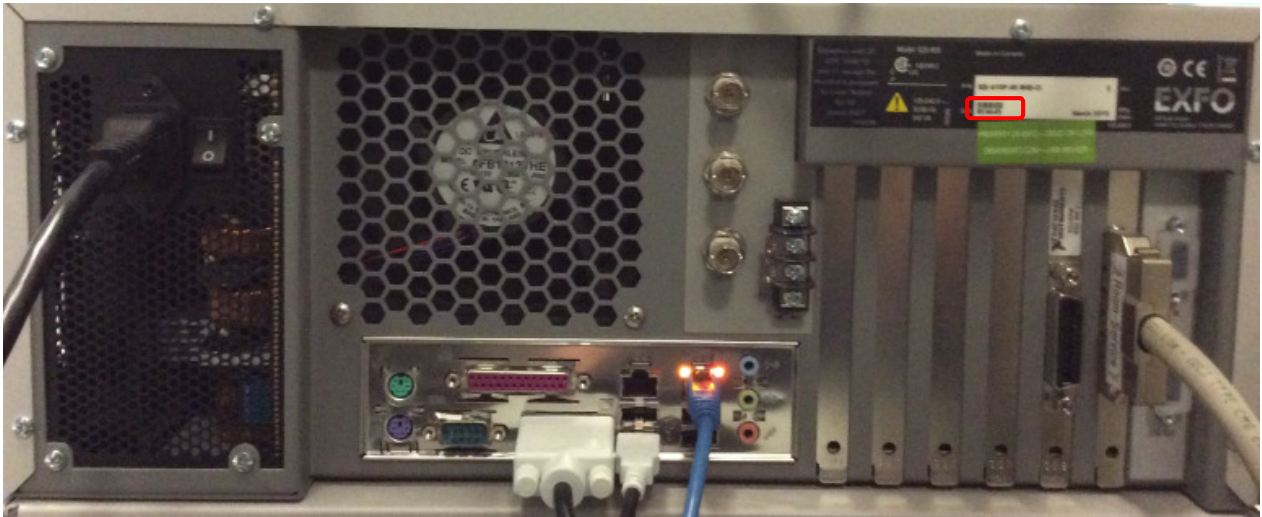

The IQS-600 consists of a mainframe unit that can house up to 10 modules; this RMA request requires the serial numbers of all units that will be sent for service, even serial numbers of units that don't require service but will be returned within the RMA request. Click the links below to know how to retrieve those serial numbers:

- [IQS-600 mainframe serial number](#)
- **Modules** serial numbers:

Module serial numbers in “IQS Manager”

The serial numbers of the modules can be found in “IQS Manager/Current Modules”:

The screenshot shows the IQS Manager software interface. The title bar indicates the user is logged on as IQS-600-WEPOS\Administrator [Administrator]. The main window is titled "Current Modules" and displays a tree view on the left showing the hierarchy of modules. The central table lists the modules with their serial numbers highlighted in a red box.
